

# IO类型手柄使用指南

## IO类型手柄使用指南

### 版本

### 更新日期

### 更新说明

### 文档状态

### 维护责任人

V1.0

2024.5.16

### 新建

### 使用中

### 适用范围

控制器：SRC全系列

### 实现方式

通过 IO 高低电平的变化，触发模型文件配置的 trigger，调用上传的脚本使 AGV 进行开环运动。适用设备：有线IO扩展模块，无线IO扩展模块，PLC等。

### 使用方法

#### 1、上传脚本文件

c78c12cc154f7e4617c92421c4b8625.png

## 2、配置trigger

image.png

---

### 脚本示例

---

```
# -- coding: utf-8 --
```

```
# @Date : 2022/2/24 17:41
```

```
# @Author : huang qiangsheng
```

```
# @Version : 1.0
```

---

```
# @Project : 增加通过di开环发送速度的示例
```

```
import math
```

---

```
import time
```

---

```
import sys
```

---

```
sys.path.append("syspy")
```

```
from syspy.rbk import MoveStatus, BasicModule, ParamServer from syspy.rbkSim import  
SimModule
```

```
